

# Trantorque GTR

## Trantorque GTR

### High Power, Critical Timing Solution

Trantorque GTR keyless bushing is the ideal solution for high power or critical timing applications. It offers a mechanical shrink-fit eliminating the problems of fretting corrosion, backlash and key wear.

#### Benefits

- Locks and unlocks with the twist of just one nut
- Precise radial and axial adjustment on shaft.
- Ideal for timing components
- Trantorque GTR is "self-centering" unlike other cone clamping units. It needs no location diameter in components to retain concentricity
- Repair of damaged keyways, just slip Trantorque GTR over the damaged keyway to effect repair
- Eliminates keyways thereby reducing shaft costs.
- Also allows smaller shaft as the keyway does not weaken the shaft
- Ambient operating temperature -34°C to +204°C

Size Reference	Bore Size in mm
184A0105 to 184P0175	5mm to 75mm

#### Construction

Locks and unlocks with the twist of just one nut

Self centering single nut design

Keyless bore
