

Section 7:

Inverters

Fenner QD (Quick Drive) Series inverters are ideal for both simple and sophisticated applications, due to their broad range of functions, easy configuration, simple installation and ultimate performance.

- The QD:HVAC sets a new standard for dedicated fan and pump control whilst retaining ease of use. The innovative design, combined with robust performance provides powerful flow control and reliability in a compact drive.
- The Fenner QD:Neo offers the perfect combination of high performance and simplicity providing solid solution for the most demanding applications. Suitable for use with both standard and permanent magnet motors.
- The Fenner QD:E is a revolution in simplicity. Quick and easy to install and commission and general purpose drive with V/F control

Inverters: Design Data Required

Electrical supply voltage
Constant/variable torque application
IP rating required
Driven machine
Speed range of machine
Cable length to motor
Control options required
Ambient temperature
Communication options required

Fenner QD Series Inverters

Simple, precise control

The power to save energy

- > Wide power range, from 0.37kW to 250kW
- > Robust design in IP20, IP55 and IP66 variants
- > Quick and simple installation and commissioning
- > Built-in features which combine to offer significant total cost reductions compared to other leading manufacturers

Fenner®

THE MARK OF ENGINEERING EXCELLENCE

Applications

CONVEYING

Obtaining the optimum speed of product transfer is a primary requirement of all conveyor systems. Fenner QD inverters and Fenner FM:3 motors are suitable for horizontal, vertical or inclined conveyors, to give accurate speed control and a high starting torque to ensure reliable and efficient transportation of products.

BUILDING MANAGEMENT

Comfort and efficiency are key requirements for the environment within today's modern buildings. Easy to install and reliable Fenner QD inverters and FM:3 motors ensure that the large number of motors driving fans and pumps for heating, ventilation and air conditioning are running at their optimum level, saving both energy and protecting the environment.

MIXING

For fixed speed or variable speed mixing applications, Fenner QD:Neo Inverters and FM:3 motors provide, high starting torque and application specific programmes ensuring mixing process times are optimised to improve productivity and increase efficiency.

PULP AND PAPER

From complex multi-function process control to single drive applications Fenner QD inverters and FM:3 motors can reliably improve preparation and manufacturing processes from the wood yard or recycling yard to the paper machine and the paper converting process. Continuously improving uptime, quality and efficiency.

PLASTICS/MOULDING

Long running hours, a harsh working environment and precise speed control are just some of the tasks Fenner QD inverters and FM:3 motors are designed to deliver. From a single conveyor application to fully integrated extrusion/moulding, the Fenner motors and drives package delivers a new level of control, reliability, flexibility and efficiency.

PUMPING

Pump systems need to be both reliable and efficient, ensuring that the correct volume of product is transported accurately and dependably. Fenner QD:HVAC inverters and FM:3 motors are designed to provide efficient and reliable service and can even be integrated into building management systems.

BOTTLING

Machinery which requires fast and accurate positioning in a harsh working environment, Fenner QD inverters are designed to work within panels or as stand-alone units allowing flexibility for high speed process applications.

Ordering Instructions

All Fenner QD Inverters are identified with a unique code number. This consists of an eight digit code depending on the enclosure, power, supply voltage and range.

Construction of the coding system is explained below.

FIRST THREE DIGITS:

Series and enclosure

Code	Range	Enclosure
572	QD:E / QD: NEO	IP20
575	QD:NEO / QD:HVAC	IP55
576	QD:E / QD:NEO / QD:HVAC	IP66

FOURTH DIGIT:

Inverter type

Code	Series
B	QD-E (Basic Inverter)
X	QD Options (All Models)
N	QD:NEO
F	QD:HVAC

FIFTH DIGIT:

Supply voltage code

Code	Voltage
2	220-240V 1~ supply
4	380-440V 3~ supply

NINTH DIGIT:

Special features

Code	Output Power
N	Non-Switched IP55 (Non-standard option)
E	Enlarged Frame Size (Non-standard option)

SIXTH, SEVENTH & EIGHTH DIGITS:

Rated power code

Code	Output Power (kW)
0P4	0.37
0P7	0.75
1P5	1.50
2P2	2.20
3P0	3.00
4P0	4.00
5P5	5.50
7P5	7.50
011	11.0
015	15.0
018	18.5
022	22.0
030	30.0
037	37.0
045	45.0
055	55.0
075	75.0
090	90.0
110	110.0
132	132.0
160	160.0
200	200.0
250	250.0

QD Inverter Options

Description	QD:E	QD:Neo	QD:HVAC	
QBrake Dynamic braking resistor for use with high inertia loads which need to be stopped rapidly				
Please note: the size 1 unit is not suitable for braking applications as it has no integral braking circuit				
572X1002	IP20; 100Ω, 200W, continuous 12kW peak for 0.125s - Sizes 2 & 3	●	●	
572X1002	IP20; 330Ω, 500W, continuous 12kW peak for 0.125s - Sizes 4,5 & 6	●	●	
572X1002E	IP55; 50Ω, 200W, continuous 12kW peak for 0.125s - Sizes 2 & 3	●	●	

QICHOKE - Input Chokes

Reduce harmonic distortion and protect Fenner QD drives against harmful supply disturbances. Input chokes available for drive sizes 1-3. Sizes 4-6 include 3 phase line chokes as standard

572X3011	IP20; Drive size 1, < 230V, single phase	●		
572X3031	IP20; Drive Size 1, < 500V, three phase	●		
572X3023	IP20; Drive Size 2, < 500V, three phase	●	●	●
572X3011E	IP55; Drive size 1, < 230V, single phase	●	●	
572X3012E	IP55; Drive size 2, < 230V, single phase	●	●	
572X3032E	IP55; Drive size 2, < 600V, three phase	●	●	
572X3033E	IP55; Drive size 3, < 600V, three phase	●	●	

QMCHOKE - Motor Chokes

QM Motor Chokes improve the quality of the output waveform. In a small number of applications output filtering is strongly recommended to improve system functionality, reliability and longevity. Such applications include: long motor cables up to 200m, high capacitance motor cables; multiple motors connected in parallel; older motors without inverter grid insulation

572X3113	IP20; Drive size 1, < 500V	●		
572X3133	IP20; Drive size 3, < 500V	●	●	●
572X3113E	IP55; Drive size 1, < 600V	●		
572X3123E	IP55; Drive size 2, < 600V	●	●	●

QRELAY-2 - QD:E Only

Provides a programmable second relay output

572X4002	QRELAY-2 Max switching voltage 250V AC, Max switching current 1A	●		
----------	--	---	--	--

QMODULE - Encoder Module*

The encoder feedback module is designed to provide closed loop speed control for the QD:NEO range.

572X7001	QMODULE External encoder module (for closed loop operation)		●	
----------	---	--	---	--

QPORT - Remote Keypad and Display

QPort units act as a remote keypad and display for QD Drives on a network which have the same serial address. The physical layout and operation of the QPort keypad and display mimic the QD drive exactly

572X0005	LED keypad and 3 metre cable	●	●	●
572X00007	OLED keypad and 3 metre cable	●	●	●
572X5600	I/O Expansion - provides extra 3 digital inputs and 1 N.O. relay		●	●
572X5601	Relay Expansion - provides extra 3 x N.O. relay outputs or Pump Cascade Expansion		●	●

QD Inverter Options

Description		QD:E	QD:Neo	QD:HVAC
QSplitter	RS485 data cable splitter is an RJ11 or RJ45 1 to 2 way connection block			
572X2000	RJ45, 1-2 way	●	●	●
QAdaptor RS485 Communications Adaptor	The QAdaptor is an isolated USB to RS485 communications adaptor designed for use with PC software studio			
572X2200	QAdaptor RS485	●	●	●
Data Cables				
572X2005	RJ45 to RJ45 RS485 data cable. 0.5 metres - blue	●	●	●
572X2010	RJ45 to RJ45 RS485 data cable. 1 metre - blue	●	●	●
572X2030	RJ45 to RJ45 RS485 data cable. 3 metre - blue	●	●	●
QSTICK Repeat Programming				
For accurate repeat programming, simply insert the QStick into the RJ45 slot on front of the QD drive with Bluetooth functionality.				
572X0006	QStick for QD:E Drives	●	●	●
Fieldbus Communications*				
Fenner QD Drives can communicate with existing networks with the use of the expansion cards				
572X8101	Profibus 9 way, D-type data cables		●	●
572X8102	DeviceNet 9 way, D-type data cables		●	●
572X8103	Ethernet TCP/IP with 9 way, D-type data cables		●	●

* Only 1 expansion module can be installed into the QD:Neo/QD:HVAC inverter

Options for QD:Inverters

QPORT REMOTE KEYPAD AND DISPLAY

OLED and LED QPorts are intelligent devices with a built in microcontroller.

Key Benefits

- Real time keypad & display operation mimics the Fenner Drive
- Single RJ45 electrical interface for power & data
- Communicates with up to 63 drives on a network
- Automatically connects to specified drive
- IP54 rated when mounted on a panel
- Parameter lock function available
- 3m Data Cable included
- Available with bright LED display (572X0005), or with Alpha-numeric OLED display (572X0007)

QBRAKE - DYNAMIC BRAKING RESISTORS

QBRAKE dynamic braking resistors are designed specifically for the Fenner QD range. For use with high inertia loads which need to be stopped rapidly.

QBRAKE dynamic braking resistors assist the drive in managing the electrical energy returned from the motor during braking, by converting it to heat energy.

Key Benefits

- Fenner QD drive software protects the QBRAKE from overload, hence no need for expensive overload relays
- Internal fusible element ensures fail safe operation
- Connects to side of drive, using the heatsink of the drive to prevent overheating (FS 2 & 3)
- No space envelope penalty, fits on side of the drive
- Series/parallel arrangements for more demanding applications
